

AJAY KUMAR MYAKALA

Enterprise UX & CX Architect | Enterprise Systems & Platform Integration

Location: Bengaluru, Karnataka

Mobile: +91 7382328066

Email: ajaykumarmyakala@outlook.com

Portfolio: [AJAYKUMARMYAKALA](#)

Professional Summary

Enterprise Digital & CX Architect with 10 years of experience leading complex digital transformations across B2B SaaS, FinTech, and highly regulated operational ecosystems. I specialize in bridging the gap between product strategy and frontend engineering, leveraging AI-native workflows to parse legacy data and accelerate React/Next.js deployments. Proven track record of governing token-driven design systems, modernizing legacy enterprise backends (SAP, CRM), and architecting strict SOC 2 and WCAG-compliant platforms that resolve severe operational complexity at scale.

Core Competencies

- **Enterprise UX Architecture:** Complex B2B Information Architecture (IA), Progressive Disclosure Pipelines, Multi-Tenant Ecosystem Strategy, Omnichannel Journey Mapping.
- **AI-Native Workflows:** LLM-Assisted Data Parsing (Claude/OpenAI), Generative UI Prototyping (v0), AI-Driven Automation Flows, Legacy Data Structuring.
- **System Governance & Design Ops:** Programmatic Figma Libraries, Advanced Design Token Architecture, 1:1 React/Next.js Engineering Handoff, UI Regression Mitigation.
- **Frontend Logic & Interaction:** Component-Level Interaction Models, High-Density Data Grid Patterns, CSS-in-JS/Tailwind Structural Alignment, Strategic Friction Design.
- **Domain & Compliance Operations:** B2B SaaS Ecosystems, SAP Fiori Execution, FinTech & PropTech Workflows, SOC 2 / Data Loss Prevention (DLP) Compliance, WCAG 2.2 AA Standards.

Experience

Homeloc Solutions LLP - Sr Product Designer | Technical UX Architecture

Mar 2024 - Mar 2026

- **Complex Data Architecture:** Architected the zero-to-one UX strategy for a multi-tenant B2B mortgage ecosystem, transforming fragmented operational databases into actionable React data grids.
- **Compliance-by-Design:** Engineered a progressive disclosure pipeline grounded in strict SOC 2 and DLP compliance, decoupling rate exploration from rigid KYC authentication walls.
- **AI-Native Engineering Handoff:** Leveraged LLMs to parse complex financial API payloads into structured logic, ensuring technical feasibility before high-fidelity design.
- **System Governance:** Directed a token-based Figma design system mapped 1:1 with frontend architecture, acting as the strategic bridge to eliminate UI regressions.

Computech Business Solutions Pvt. Ltd - Sr UI/UX Designer

Mar 2023 - Mar 2024

- **B2B Procurement Ecosystems:** Architected an end-to-end B2B supplier analytics portal, enabling Fortune 500 enterprises to track complex Tier-1/Tier-2 vendor metrics and supply chain logistics.
- **Complex Authorization Frameworks:** Engineered seamless integrations between digital front-ends and legacy ERPs (SAP, CRM), implementing strict "Maker-Checker" protocols critical for regional financial compliance.
- **Legacy System Modernization:** Directed UI architecture strictly aligned with SAP Fiori Horizon Guidelines, transforming fragmented legacy supply chains into unified, tokenized React SPAs.

Visual IT Solutions Pvt.Ltd - Sr UI/UX Designer

Sep 2022 - Mar 2023

- **GovTech Architecture:** Directed the UX architecture for high-scale civic portals, enforcing strict WCAG 2.2 AA standards across complex public service workflows.
- **Operational Workflows:** Restructured legacy administrative dashboards into streamlined, role-based operational hubs, significantly reducing task-completion time for government staff.

Gaian Solutions Pvt.Ltd - Sr UI/UX Designer

Oct 2021 - Aug 2022

- **Enterprise UX Architecture:** Architected scalable B2B platforms, decoupling rigid legacy data structures into intuitive interfaces that resolved critical operational bottlenecks.

Way2news Interactive Pvt.Ltd - UI/UX Designer

May 2018 - Jun 2021

- **Algorithmic UX & Data Rendering:** Engineered the UX architecture for India's highest-scaling hyper-local news platform, managing massive content payloads to mitigate banner blindness.
- **Front-End Logic Optimization:** Designed a vernacular-first algorithmic discovery loop utilizing variable-height ad cards and infinite scroll logic for React Native deployments.

Nitya Software India Pvt.Ltd - UI/UX Designer

Jan 2016 - May 2018

- **Multi-Actor Ecosystems:** Architected a scalable B2B job portal ecosystem, mapping multi-actor workflows for enterprise recruiters and consumer candidates.
- **Data-Driven Conversion:** Engineered advanced search and data filtering architectures, directly driving a 34% decrease in candidate funnel drop-off rates.
