EXECUTIVE SUMMARY

Product Design leader with 11 years of experience shaping complex digital products, enterprise experience and scalable design systems across FinTech, mortgage lending, SaaS, data-driven platforms and enterprise technology. Combines strategic problem framing with hands-on UX/UI craft across discovery, research, interaction design, prototyping and delivery. Experienced in applying AI/LLM tools to research, ideation, prototyping and product workflows, with a focus on AI-native, human-in-the-loop and emerging interaction models. Strong partner to Product, Engineering and business stakeholders, with experience driving design quality, mentoring and translating complex technical concepts into usable product experiences.

STRATEGIC VALUE PROPOSITION

- **Product Strategy & Ownership** - Frame ambiguous problems, identify product opportunities and translate business, user and technical constraints into clear product direction and measurable outcomes.
- **AI & Emerging Experiences** - Apply AI/LLM capabilities, HCI, AIX and MLUX principles to emerging product experiences, intelligent interfaces and human-in-the-loop interaction models.
- **Complex Product Simplification** - Transform complex enterprise workflows, operational processes and information structures into intuitive, scalable and accessible product experiences.
- **Growth & Product Adoption** - Design onboarding, engagement, self-service and customer journeys informed by behavioural insights, analytics, experimentation and business objectives.
- **Design Systems & Product Quality** - Establish reusable interaction patterns, UI standards and scalable design systems that improve consistency, accessibility and delivery efficiency.

CORE STRATEGIC CAPABILITIES

- **Product Design & Strategy:** Product Strategy, Product Discovery, Problem Framing, Product Vision, Roadmap Definition, Solution Strategy, Systems Thinking, Product Thinking, Service Design, Zero-to-One Product Development
- **AI / Agent & Emerging Experience:** AI-Native UX, Human-AI Interaction, Artificial Intelligence Experience (AIX), Machine Learning UX (MLUX), Human-Centered AI, Intelligent Interfaces, Conversational Experiences, Voice Interfaces, Computer Vision, HCI, AI Ethics & Data Privacy.
- **Enterprise UX & Complex Workflows:** Enterprise UX, Workflow Design, Information Architecture, Service Journeys, Operational Systems, Data-Heavy Experiences, Dashboard Design, Role-Based Experiences, Accessibility / WCAG, Usability Testing
- **Growth & Customer Experience:** Onboarding, Self-Service Experiences, Customer Engagement, Behaviour Analytics, Conversion Optimisation, Growth Experimentation, Retention, Monetisation, Customer Segmentation
- **Research & Discovery:** User Research, Stakeholder Interviews, Discovery Workshops, Journey Mapping, Problem Definition, Usability Testing, Ideation, Prototyping, Design Validation
- **Design Leadership:** Design Critique, Design Reviews, Design Systems Governance, Mentoring, Cross-Functional Leadership, Executive Stakeholder Communication, Product & Engineering Partnership

PRODUCT MODELS & INDUSTRY DOMAINS

- **Product models:** B2B, B2C, B2B2C, SaaS, Marketplace / P2P, D2C
- **Industry domains:** FinTech, Mortgage Technology, Procurement, GovTech, Media, AdTech, MarTech, Recruitment Technology
- **Platform patterns:** Enterprise workflows, operational systems, data-driven dashboards, customer data and audience intelligence platforms, campaign and monetisation systems

PROFESSIONAL EXPERIENCE

HOMELOC SOLUTIONS LLP – Lead Product Design Consultant | Apr 2024 – May 2026

- Led end-to-end product design and product strategy for complex US mortgage and lending workflows, partnering with Product, Engineering and business stakeholders to shape product priorities and scalable customer experiences.
- Framed complex borrower and operational problems across origination, underwriting, onboarding, servicing and lending operations, translating ambiguity into journeys, workflows and solution direction.
- Facilitated discovery, product-vision and design-review conversations, aligning business objectives, user needs, operational constraints and technical implementation realities.
- Mapped end-to-end customer and operational journeys and drove workflow optimisation; an implemented underwriting workflow improvement reduced decision time by 37%.
- Established reusable interaction patterns and design standards across customer and operational experiences while collaborating with teams across AWS and Azure ecosystems.

COMPUTECH CORPORATION – Sr UX Designer | Mar 2023 – Mar 2024

- Led UX strategy and product design for enterprise platforms spanning procurement, supplier diversity, compliance, spend visibility and reconciliation.
- Framed complex business and operational requirements into service experiences, supplier onboarding workflows, reporting systems and data-intensive dashboards.
- Framed complex business and operational requirements into service experiences, supplier onboarding workflows, reporting systems and data-intensive dashboards.
- Partnered with CEO, Product Managers and Engineering teams to influence product priorities, resolve ambiguity and translate business objectives into practical product experiences.

VISUAL IT SOLUTION – Sr UX Designer | Sep 2022 – Mar 2023

- Contributed to digital transformation initiatives for government and public-sector platforms, including ePragathi and citizen-service ecosystems.
- Contributed to digital transformation initiatives for government and public-sector platforms, including ePragathi and citizen-service ecosystems.
- Applied accessibility-focused design principles to improve usability across diverse public-service audiences.
- Produced process flows, wireframes, prototypes and production-ready interfaces.
- Collaborated with business analysts, architects and engineering teams to translate service requirements into process flows, wireframes, prototypes and production-ready interfaces.

GAIAN SOLUTION – Sr UX Designer | Oct 2021 – Aug 2022

- Designed enterprise broadcasting, television technology and media monetisation experiences supporting digital content distribution and audience engagement.
- Designed enterprise broadcasting, television technology and media monetisation experiences supporting digital content distribution and audience engagement.
- Simplified complex content-management workflows, operational dashboards and interaction models across media ecosystems.
- Designed experiences spanning advertising workflows, reporting, content operations and audience engagement.

WAY2NEWS INTERACTIVE PVT. LTD – Sr UI/UX Designer | May 2018 – Jun 2021

- Designed consumer and enterprise product experiences across Way2News, AudiencePlay, AudiencePrime, DigitalKites and TheTasteCompany spanning Media, AdTech, MarTech, audience intelligence and customer engagement.
- Designed mobile-first content discovery and engagement experiences alongside enterprise workflows for customer segmentation, campaign management, audience intelligence and monetisation.
- Applied audience insights, behavioural analytics and platform data to inform experiences supporting engagement, retention and product adoption.
- Partnered with Product, Marketing, Editorial and Engineering teams to translate customer, business and platform requirements into scalable product experiences.

NITYA SOFTWARE INDIA PVT. LTD – UI/UX Designer | Jan 2016 – May 2018

- Designed recruitment technology, communication products, enterprise web applications and client-facing digital experiences including JobsNProfiles and VioTalk.
- Created information architecture, user flows, wireframes and responsive product experiences while partnering with development teams through implementation.
- Created information architecture, user flows, wireframes and responsive product experiences while partnering with development teams through implementation.
